## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-16, drawn to a process of making a medicament comprising 5HT1 agonist, classified in class 424, subclass 439, 451, 464, 489.
  - II. Claim 17, drawn to a process of preventing the headache phase of migraine, comprising administering 5HT1 agonist, classified in class 514, subclass 406, 414, 415.
  - III. Claims 36-37, drawn to a process of preventing the headache phase of migraine, comprising administering a non-narcotic analgesic, classified in class 514, subclass 159, 165, 326, 336, 374, 619, 629.
  - IV. Claims 19-35 and 38-40, a process of providing preemptive prophylaxis migraine method comprising the step of determining prodromal symptoms of migraine by performing the cognitive tests of: a Simple Reaction Time, a Running Memory Continuous Performance Task, a Matching to Sample, and a Mathematical processing Task; establishing a baseline indicator from the performed tests; interpreting the results of the repeated tests as a percent of baseline indicator of need for prophylaxis; and administering an anti-migraine medication, classified in class 600, subclass 300, 301.

If applicant elects Group I, II or IV, a composition claim (claim 18) will be examined along with the elected group since it contains common limitations for the invention I, II and IV.

Art Unit: 1614

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (e.g., Specific Examples in the specification) from under the instant claims of the elected Group. Moreover, whatever specific compound is ultimately elected, applicants are required to list all claims readable thereon.

With the election of a specific exemplified compound, a generic concept will be identified by the examiner as the inventive group for examination.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
